DETAILED ACTION

THIS OFFICE ACTION IS IN RESPONSE TO APPLICANT'S AMENDMENT FILED 9/25/2007.

Status of Claims

- Claims 1, 3-7, and 9-13 are canceled.
- Claims 2 and 8 were amended.
- Claims 2 and 8 are pending.

Response to Arguments

[1] Applicant's amendment filed 9/25/2007 regarding rejections under 35 U.S.C. 102 have been fully considered. Due to the amendment to the claims, the prior art fails to further anticipate. Accordingly, the Examiner has withdrawn all previous rejections over Shirai.

Allowable Subject Matter

[2] Claims 2 and 8 are allowed.

Reasons for Allowance

[3] The following is an examiner's statement of reasons for allowance. This application has been reviewed by the examiner and meets all formal and substantive (i.e., statutory) requirements and the language of the claims is enabled by, and finds adequate descriptive supported in the application disclosure as originally filed.

The primary reason for the allowance of the claims is the presence of limitations in the independent claims, which are not found in the prior art references. The examiner believes that the record of the prosecution as a whole makes clear his reasons for allowing a claim or claims. However, the examiner would like to point out one or more specific reasons and/or limitations that the prior art fails to disclose and/or make obvious. Hence, the prior art fails to disclose of a bendable bottom of a bed including a plurality of side-by-side bars; a plurality of connecting protrusions, every two adjacent connecting protrusions separated by a gap, said connecting

protrusions disposed on one of every adjacent two of the side-by-side bars, extending generally parallel to the longitudinal axis of the bed, and having an approximate rectangular cross-section taken in a direction perpendicular to the longitudinal axis of the bed; a plurality of recesses; disengagement means; corresponding accepting recesses; wherein first and second beveled portions of said connecting protrusions form clearances between the protrusions and corresponding faces of the recesses to allow the connecting bars to bent a preset distance in one direction only; and the second beveled portions at bases of connecting protrusions are inclined in adaptation to desired bending angles with adjacent bars so that adjacent bars can be adjusted in their intervals and can be rotated in one direction up to a predetermined angle.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee, and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
